Sailors' Folk Art Under Glass - Louis Arthur Norton - 1995

many of whom sailed from our idealism. The common lack of technical mastery found compensation in freedom of expression, simplicity, honesty and inventiveness. The sailor artisan used the technical skills needed to perform or survive at sea into works of beauty within a nautical design. This has been preserved as finely crafted folk art, and in some ways a form of industrial art. This form of sailors' folk art is a collection of extraordinary pieces, which often leave the viewer with the vexing question, "How did they do such work, many times under the grueling conditions of a voyage at sea?" It is the intent of the author to acquaint the reader with the beauty and breadth of these works, as well as to their history and references in literature."

American Women's Regionalist Fiction - Monika Elbert - 2021-01-04

American Women's Regionalist Fiction: Mapping the Gothic seeks to redress the monolithic vision of American Gothic by analyzing the various sectional or regional attempts to Gothicize what is most claustrophobic or peculiar about local history. Since women writers were often relegated to inferior status, it is especially compelling to look at women from the Gothic perspective. The regionalist Gothic develops along the line of difference and not unity—thus emphasizing regional peculiarities or a sense of superiority in terms of regional history, natural landscapes, immigrant customs, folk tales, or idiosyncratic ways. The essays study the uncanny or the haunting quality of “the commonplace,” as Hawthorne would have it in his introduction to *The House of the Seven Gables*, in regionalist Gothic fiction by a

This collection seeks to examine how/if the regionalist perspective is small, limited, and stultifying and leads to Gothic moments, or whether the intersection between local and national leads to a clash that is jarring and Gothic in nature.

The New England Mariner Tradition - Robert A. Geake - 2013-10-22

For over three centuries, New Englanders have set sail in search of fortune and adventure--yet death lurked on every voyage in the form of storms, privateers, disease and human error. In hope of being spared by the sea, superstitious mariners practiced cautionary rituals. During the winter of 1779, the

Trader" offered up gin to appease the squalling storms of Neptune. In the 1800s, after nearly fifty shipwrecks on Georges Bank between Cape Cod, Massachusetts, and Nova Scotia, a wizard paced the coast of Marblehead, shouting orders out to sea to guide passing ships to safety. As early as 1705, courageous settlers erected watch houses and lighted beacons at Beavertail Point outside Jamestown, Rhode Island, to aid mariners caught in the swells of Narragansett Bay. Join Robert A. Geake as he explores the forgotten traditions among New England mariners and their lives on land and sea.

Food for the Dead - Michael
E. Bell - 2011-10-15
For nineteenth-century New
Englanders, "vampires"
lurked behind tuberculosis. To
try to rid their houses and
communities from the scourge
of the wasting disease,
families sometimes relied on
folk practices, including
exhuming and consuming the
bodies of the deceased.
Author and folklorist Michael
E. Bell spent twenty years

exhuming and consuming the vampire in New England. While writers like H. P. Lovecraft, Henry David Thoreau, and Amy Lowell drew on portions of these stories in their writings, Bell brings the actual practices to light for the first time. He shows that the belief in vampires was widespread, and, for some families, lasted well into the twentieth century. With humor, insight, and sympathy, he uncovers story upon story of dying men, women, and children who believed they were food for the dead. This Wesleyan paperback edition includes an extensive preface by the author unveiling some of the new cases he's learned about since *Food for the Dead* was first published in 2001.
