Moonflower Murders - Anthony Horowitz - 2020-11-10

Featuring his famous literary detective Atticus Pund and Susan Ryeland, hero of the worldwide bestseller Magpie Murders, a brilliantly complex literary thriller with echoes of Agatha Christie from New York Times bestselling author Anthony Horowitz. Retired publisher Susan Ryeland is living the good life. She is running a small hotel on a Greek island with her long-term boyfriend Andreas. It should be everything she's always wanted. But is it? She's exhausted with the responsibilities of making everything work on an island where nothing ever does, and truth be told she's beginning to miss London. And then the Trehearnes come to stay. The strange and mysterious story they tell, about an unfortunate murder that took place on the same day and in the same hotel in which their daughter was married—a picturesque inn on the Suffolk coast named Farlingaye Hall—fascinates Susan and piques her editor’s instincts. One of her former writers, the late Alan Conway, author of the fictional Magpie Murders, knew the murder victim—an advertising executive named Frank Parris—and once visited Farlingaye Hall. Conway based the third book in his detective series, Atticus Pund Takes the Cake, on that very crime. The Trehearne’s, daughter, Cecily, read Conway’s mystery and believed the book proves that the man convicted of Parris’s murder—a Romanian immigrant who was the hotel’s handyman—is innocent. When the Trehearnes reveal that Cecily is now missing, Susan knows that she must return to England and find out what really happened. Brilliantly clever, relentlessly suspenseful, full of twists that will keep readers guessing with each revelation and clue, Moonflower Murders is a deviously dark take on vintage English crime fiction from one of its greatest masterminds, Anthony Horowitz.

The Zodiac Conspiracy : Your Real Sun Sign - Dr. Atara - 2011-11-14

The appearance of an astronomer, who was discussing the 13th constellation on national TV last year, caused a huge outcry from the public. The big question was, "How can my sun sign be different?" Many people concluded that the astronomer did not know what he was talking about! People wanted to know how their Sun sign could be different than what they had been told all these years. Actually, the astronomer was very correct; he was telling everyone the truth as indicated by the science of astronomy, which the psycholgical art of astrology is based upon. There are 13 constellations and has always been 13. This is why the book also features a section on Ophiuchus, which is the 13th constellation and the only constellation/sign named after a human being, Imhotep an African Egyptian. There has been a conspiracy of silence among Western astrologers to misrepresent the history of astrology and ignore the truth of astronomy. Since astrologers did not adhere to the science of astronomy, as dictated by the constellations, they created an alternative paradigm called the Koch zodiac system, which only acknowledges 12 constellations and therefore 12 signs. Astrologers who live in the Eastern part of the world practice the truth of astronomy by using the Sidereal zodiac system. Most people in the Western world actually believe that on January 1st their Sun sign is Capricorn. However, the truth is that the Sun is actually in the constellation of Sagittarius. This is the truth of astronomy and the sidereal zodiac system. So, if you were born on January 1st (of any year) your Real Sun Sign is Sagittarius (not Capricorn). This book shows everyone (who wants to continue believing in their old "sign", while embracing the truth of their Real Sun Sign), how to blend these two systems, so that who you REALLY ARE and what you are destined to learn about yourself, is anchored in the truth. It is a gentle reminder that you are not living your most authentic self. Are you the Virgo, Selfless Servant or Aquarius, The Giver? Read, the Zodiac Conspiracy and be introduced to the truth and Your Real Sun Sign.
